

Corporate Identity Management

Maintaining the integrity of your corporate branding is paramount to projecting a consistent public image. The professionals at MLI Integrated Graphic Solutions work to ensure that every item we produce for you follows your established graphic standards.

New orders are compared with previous orders of the same item to verify accuracy of specifications. When you place an order, you can be sure that we will use the correct ink, paper and artwork.

Artwork files are stored on a central server, which is backed up daily. Older files are archived indefinitely, so we always have your complete history at our fingertips.

Quality controls throughout each step of the production process — from order entry all the way through to shipping — confirm that what you ordered is what you will receive.
