

Premedia

Many people have an eye for design. Many people know how to set up files in graphic programs such as Quark XPress, InDesign, Illustrator, Photoshop or the likes. But the majority of these people do not know how to prepare files properly for print or online use.

MLI Integrated Graphic Solutions can provide you with pre-flight tools to assist in preventing costly errors even files before you send your files to us. This can save time by allowing you to provide fully usable files.

We automatically preflight all files we receive for image resolution, quality, proper color setup, missing elements, etc. By checking files in the initial stage, we can alert you to problems, giving you the option of correcting them, before the expense of proofs has been incurred. If you need help fixing your files, we can do the work for you, or walk you through the process.
